AWS certified professional with experience of over 3+ years in IT Industry with best practice technologies and standards. An autonomous worker committed to providing high quality services, seeking to leverage my technical and professional expertise to learn and grow in the new role at your company.

Experience

Feb 2015 -Dec 2016

Support Engineer

HCL Technologies, Client: Deutsche Bank

- Worked as an escalation point for Incident Managers and ensured their bridging, including initiation of any necessary escalations and business impacting issues.
- Involved in the production incidents/ issues and fixing them by making the
 necessary changes in Shell Scripts, Control-M command lines or Database
 tables and conducted end-to-end testing/ sanity testing as a part of the
 deployments.
- Involved in collecting change requirement from client and make code changes, testing and releasing it into the production.
- Performed incident management (ServiceNow) tickets in case of batch delays and also updated the business users with notification for file delay.
- Headed a team of 5 members.

Dec 2016 - present

Senior Cloud Engineer

HCL Technologies, ElasticOps-Cloud CoE

- Designed, implemented and maintained AWS infrastructure and services within a managed service environment.
- Designed and deployed available, cost effective and fault tolerant systems.
 Maintained enterprise class security, network and systems management applications within an AWS environment.
- Worked extensively with AWS services like VPC, EC2, S3, ELB, AutoScaling Groups (ASG), EBS, RDS, IAM, CloudFormation, Route 53, CloudWatch, CloudFront.
- Maintained documentation and standards; undertook capacity planning for growth and changes.
- Trained in implementation of Continuous Integration and Continuous Delivery using Jenkins, Docker and GIT. Implementation of automation using Configuration Management tools like Ansible.
